Skills

React, Angular, Javascript, Typescript, Node, Express, Next.js, REST, Redux, Git, Jest, Jasmine, Karma, RxJS, PostgreSQL, GraphQL, MySQL, Spring, HTML, CSS, LESS, SASS, Storybook, Tailwind, Material

Experience

Front End Developer	*Transact Campus*	Mar 2024 - Present

- Contributed to developing and optimizing tuition payment plans, campus payments, and one-card ID solutions with Angular 18, delivering seamless user experiences.
- Maintained code quality through unit tests, conducting thorough code reviews for team members, and collaboration in design reviews to meet project goals.
- Proactively addressed technical challenges by identifying and filling gaps in implementation, improving development workflows, and sharing insights with the team to promote collaborative growth.

Front End Developer	*KOHO*	Jun 2023 - Mar 2024

- Employed Angular 16 and Ionic to develop intuitive and user-friendly interfaces for a high-functioning mobile banking application.
- Assumed full ownership of epics throughout the software development lifecycle, from initial concept to final production release.

Front End Developer	*Deckers*	Feb 2023 - Jun 2023

- Developed Server Side Rendered pages using React and Next.js.
- Improved APIs by implementing caching for large data sets.
- Implemented SEO optimizations using Next.js.

Front End Developer	*RepVue*	Apr 2022 - Feb 2023

- Developed a web application from scratch, using React and Next.js.
- Implemented RESTful APIs using Ruby on Rails.

Full Stack Developer	*DreamBox Learning*	Oct 2020 - Mar 2022

- Migrated old code from AngularJS to Angular 12.
- Created pages using Angular 12 , with a main focus on graphs, reports and statistics.
- Promoted accessibility focus, leading to improved website accessibility using tools like WAVE for analysis.
- Developed and refactored existing RESTful APIs using Spring Boot.
- Increased existing APIs unit test coverage from 60% to 80%.

Full Stack Developer	*WebPT*	Nov 2019 - Oct 2020

- Added/refactored new pages and functionalities to the existing PHP codebase.
- Developed RESTful APIs using Node/Express.

Front End Developer	*Nova Solutions Systems*	Jan 2018 - Aug 2019

- Developed reusable components using AngularJS, Angular 6 and React.
- Raised the unit test coverage from 75% to 95% using Jasmine.
- Trained two new coworkers in AngularJS and project business rules.
- Played a pivotal role in developing a large-scale enterprise application for a major client, catering to millions of users across Mexico.
